# Game Design: Art and Concepts

Stemming from the principles of storytelling and design established in CalArts' renowned Animation programs, this Specialization lays a primary foundation for experimentation and exploration of video game design, story, character development, and winning gameplay before programming begins. These four courses emphasize the self-reliance and personal expression of the gaming artist, and encourage you to take conceptual risks and develop new modes of expression and form through gaming. In the final Capstone Project, you'll put your creative skills to work by generating an engaging game design document for a personal game project, outlining the conceptual, narrative and aesthetic elements of your game.
